

# COVID19 Killer

## Germicidal Unit Model No: MI 600x600 UVC/GU

Lay in 595 x 595 mm air purification unit – simply drops into ceiling grid – like a panel light.

Dirty pathogens are sucked in – destroyed by the UVC (254nm) light within – and the clean air is expelled.

Once lid is removed – a safety switch disconnects – ensuring harmful UVC lamps are off – keeping maintenance staff safe.

View of back – with 'lid' in place.

Cleanable/replaceable air filters

UVC chamber – hidden from users

fans

View of back – with 'lid' removed – to access lamps for replacement.

### How it works...

Air is sucked in on the left side – through the slots, through a sponge filter – then into a chamber containing 2 x UVC lamps (254nm) – the UVC lamps destroy the pathogens in the air and the air is then expelled through the vents on the right.

One of these UVC air scrubbers can clean a room of 5m x 5m x 2,6m - 3 -4 times an hour.

As the UVC lamps are not exposed - this unit is safe to use while humans are in the room.
